An Individualized Education Program (IEP) is a written statement of the educational program designed to meet a child's individual needs. Every child who receives special education services must have an IEP. That's why the process of developing this vital document is of great interest and importance to educators, administrators, and families alike.

The IEP has two general purposes:

- to set reasonable learning goals for a child, and
- to state the services that the school district will provide for the child.
